

Here is a picture of a fox. Can you re-draw him?

In your drawing can you:

- ✓ Make his fur look as thick & full of texture?
- ✓ Make his teeth and fangs appear at the right size?
- ✓ Make his tongue & nose look wet?
- ✓ Draw in the reflection of light showing in his eyes?
- ✓ Capture those wrinkles in his nose?
- ✓ Get the fox's shoulders in proportion to his head?
- ✓ Draw in all his whiskers?
- ✓ Get the shades of orange exactly the same as in the picture?
- ✓ Get the shades of grey exactly the same as in the picture?

The mouth area is hard to draw in - practice here	The fox's nose is at a weird angle - practice here
---	--

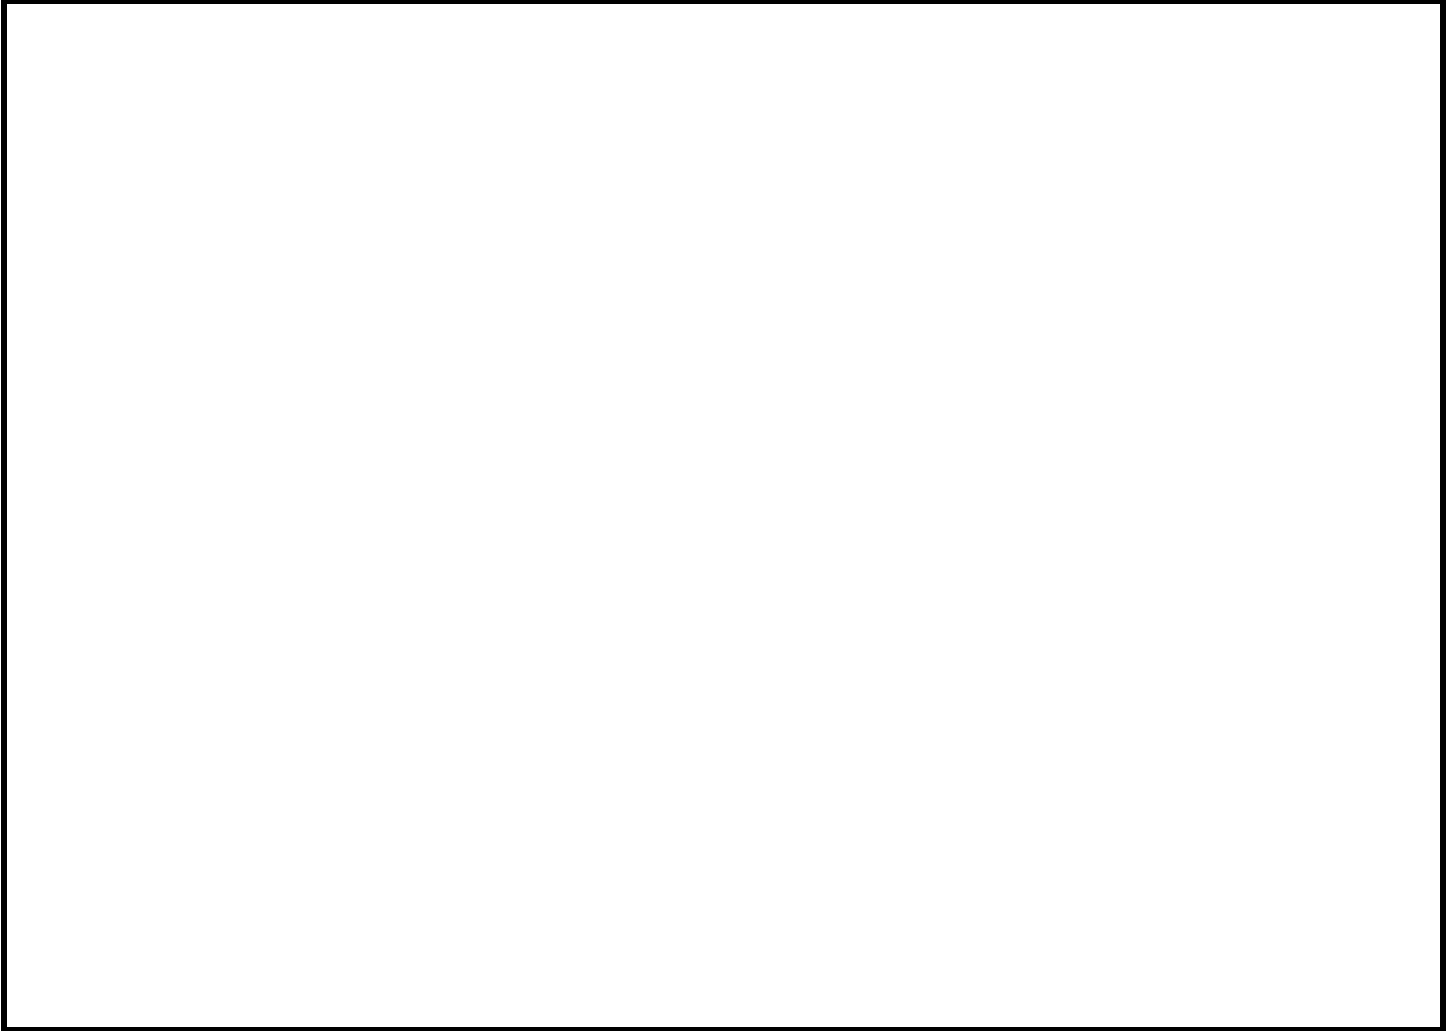

Try this - Get a ruler & Pencil.

1. Measure 3 lines going across the picture of the fox's face - equal distances like above
2. Measure 3 lines going down the picture of the fox's face - equal distances like above
3. The result will be that you have drawn the same graph above, over the photo of the fox.

Now:

Use your pencil to copy and draw the fox's face in each square of the photo, into the correlating square above!

The Fox
